

IT之家 12 月 2

日消息，非同质化代币（NFT）虽然被越来越多人接受，在加密货币 / 区块链圈内非常火爆。但是苹果对此并不持开放态度，近日因为 NFT 问题拒绝了 Coinbase Wallet 的应用更新。

You might have noticed you can't send NFTs on Coinbase Wallet iOS anymore. This is because Apple blocked our last app release until we disabled the feature. 🙄

由 Google 翻译自 英语

您可能已经注意到您不能再在 Coinbase 钱包 iOS 上发送 NFT。这是因为在我们禁用该功能之前，Apple 阻止了我们上一个应用程序的发布。 🙄

回复 @CoinbaseWallet
Apple's claim is that the gas fees required to send NFTs need to be paid through their In-App Purchase system, so that they can collect 30% of the gas fee.

For anyone who understands how NFTs and blockchains work, this is clearly not possible. Apple's proprietary In-App Purchase system does not support crypto so we couldn't comply even if we tried.

This is akin to Apple trying to take a cut of fees for every email that gets sent over open Internet protocols.

The biggest impact from this policy change is on iPhone users that own NFTs - if you hold an NFT in a wallet on an iPhone, Apple just made it a lot harder to transfer that NFT to other wallets, or gift it to friends or family.

Simply put, Apple has introduced new policies to protect their profits at the expense of consumer investment in NFTs and developer innovation across the crypto ecosystem.

We hope this is an oversight on Apple's behalf and an inflection point for further conversations with the ecosystem.

Coinbase Wallet 并不认可苹果官方给出的理由，认为苹果的应用内购买系统并没有纳入加密货币。IT之家了解到，目前苹果应用内购买系统并不支持加密货币结算，因此 Coinbase Wallet 认为并不应该收取 30% 的佣金。

Coinbase Wallet 认为苹果的阻挠，iPhone 用户很难将 NFT 资产转移到其它钱包中，甚至难以将其作为礼物送给朋友和家人。上个月，苹果更新了 App Store 指南，对带有 NFTs 的应用制定了新的规则。新指南明确指出，第三方应用程序不能“引导客户使用应用内购买以外的购买机制”。

IT之家了解到，Coinbase 是一家正在成长的比特币钱包和交易服务提供商，总部位于旧金山，是世界上最大的消费者比特币钱包，也是美国首个规范的比特币交易所。而 Coinbase Wallet 是一个自托管的行动加密钱包及 Web3 非集中式应用程序（Dapp）浏览器，能协助您掌控您的加密货币、NFT、DeFi 活动以及数字资产。
